

KUSHANK NARULA

Full-Stack MERN Developer | Backend Developer

Professional Summary

Enthusiastic B.Tech student with hands-on experience in building full-stack web applications using the MERN stack. Proficient in developing responsive user interfaces with React.js, Tailwind CSS, and Redux Toolkit, along with scalable backend services using Node.js, Express.js, and MongoDB. Experienced in implementing secure authentication, RESTful APIs, and AI-powered features. Passionate about building scalable applications and continuously learning modern web technologies.

Education

Bachelor of Technology (B.Tech)
Your College Name
CGPA: 7.95
Expected Graduation: 20XX

Technical Skills

Languages: C++, JavaScript

Frontend: React.js, Redux Toolkit, Tailwind CSS, Framer Motion, HTML5, CSS3

Backend: Node.js, Express.js

Databases: MongoDB, Redis (Learning)

Authentication & Security: JWT, Firebase Authentication, bcrypt

Tools: Git, GitHub, Postman, REST APIs, Multer, OpenRouter API, Recharts, Vite, npm

Projects

AI Smart Interview Platform

- Developed a full-stack AI-powered mock interview platform using the MERN stack.
- Built a responsive frontend using React.js, Tailwind CSS, Framer Motion, and Redux Toolkit.
- Implemented JWT authentication with access/refresh token rotation using HTTP-only cookies.
- Integrated Firebase Google Authentication, Multer, and OpenRouter API.
- Developed scalable RESTful APIs with centralized global error handling.
- Currently integrating a payment gateway.

AI-Powered Personal Finance & Budget Tracker

- Architected a full-stack finance application with secure authentication and dashboards.
- Engineered a modular Financial Engine for analytics and business logic.
- Developed AI-powered analytics including forecasting, anomaly detection, and health scoring.
- Built hybrid expense categorization using keyword matching and Naive Bayes NLP.
- Designed secure REST APIs with JWT authentication and bcrypt.
- Created interactive dashboards using Recharts.

Job Portal

- Project details to be updated.

Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Achievements

- Developed multiple MERN applications integrating AI services and secure authentication.
- Implemented JWT token rotation, centralized error handling, and modular backend architecture.
- Continuously learning Redis, scalable system design, and distributed application development.

Soft Skills

Problem Solving • Analytical Thinking • Communication • Team Collaboration • Adaptability • Time Management
